Registration requires the user to input personal information and to agree to terms and services.

Registration

• Password should be 8-16 characters

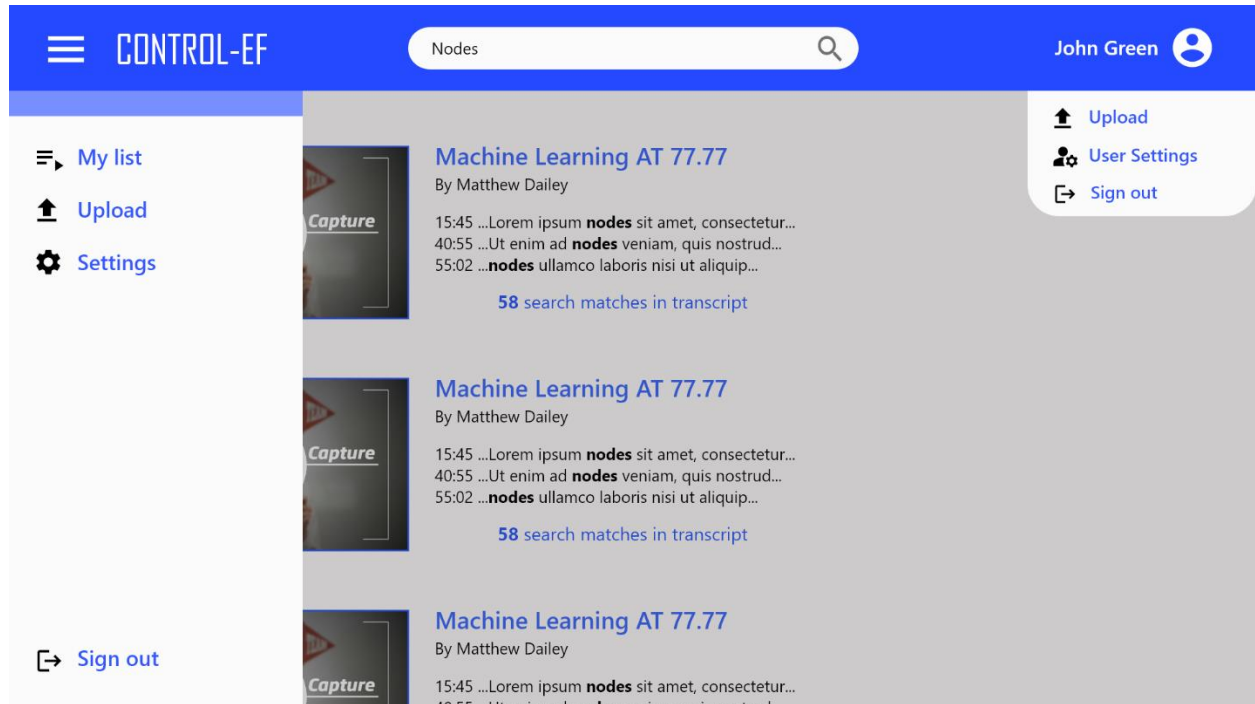

☐ I agree with terms conditions and privacy policy

☐ Send anonymous data for improvement

Submit Registration

Use case: UploadVideo

User can access the Upload interface through hamburger menu or pressing on the user picture.

If a user is of a user type “admin” or “lecturer”, he or she can upload a video through this page. Before uploading, the user must provide a name, some description, at least one tag and can choose to restrict the accessibility of this video. For the video itself the user can upload it by providing a YouTube video link or upload it directly.

Restrictions

Upload by YouTube link

OR

Select a file from your PC

The software currently supports only mp4 and mp3 files

Submit for processing

After “submit for processing” is pressed, the video is being processed. It can be canceled by pressing “cancel” or the user can leave the screen by pressing “Finish” and he or she will be notified when the video processing has been completed.

Use cases: SearchTag and SearchKeyword

After signing in, the user is able to search any word or phrase by entering it into the search bar and pressing “Enter” or the magnifying glass icon.

The search provides all videos with the word or a phrase in the transcript, name or tags. The results show the thumbnail, name, the uploader and the instances of the word or phrase. Also, the number of instances in that video.

When the user presses on a video, he or she is taken to video player page. Here the user can play the video and also look at the transcript.

Use case: AdminMonitoring

User can access other user specific pages through the hamburger menu or pressing on the users name/picture. For this use case, the user presses “User Settings”

In User settings, the user can change his or her picture and other information. User can also manage uploaded videos or access admin dashboard. Also, account deletion is also available. For this use case, the user presses “Admin dashboard”.

In Admin dashboard the user can see personal and video statistics. In addition to that this page is where complaints are being sent and the user can reply to them.
